## 7) Feeling Safe in an Unsafe World – (Supporting Children’s Emotional Well-being in Times of Anxiety) £350 setting/ £45 individual

We have had an overwhelming amount of requests for this training so we have created a brand new course to help settings rethink and re-evaluate their practice to make sure children get the best possible start when they return to School, Nursery or After-school settings.

The course looks at children’s different experiences of the Covid19 crisis and how those experiences will have shaped the fundamental structure of their brains to directly affect their development and behaviour. We also examine why more traditional behaviour methods simply don’t work when it comes to supporting positive behaviour especially during and after a time of crisis. The course highlights what is truly important for children’s well-being and how we need to focus on emotional well-being first and foremost if we want children to thrive. We need to be more aware than ever that children need time, patience and above all positive adults in their lives.

This ground-breaking course is suitable for agencies working with all ages of children and is the equivalent of a full day’s training course with 11 video modules plus bonus sections. (Full Day Equivalent)

The course also highlights mathematical progression and how we can support maths not as artificial construct imposed by adults but as an intrinsic part of the child’s world as they continually assess, quantify and experiment within their early years environment. Finally the course looks at the anxiety sometimes associated with maths and how we can prevent this in our children and overcome it in ourselves.

Uniquely presented in bitesize modules by National award-winning training and children’s organisation Inspired Children, this course is essential for anyone wanting to make maths more accessible, active and above all joyful for their young children. (Full Day Equivalent)
